

Entering Patient Influenza Data in CROWNWeb

It is critical that dialysis facilities report an influenza vaccination status on all patients in CROWNWeb.

When completing Hemodialysis or Peritoneal Dialysis clinical data entry, please select either yes or no for each patient's influenza vaccination status.

If the patient received the flu vaccine this year; select yes, enter the influenza vaccination month and year, and where the patient received the flu vaccine.

Clinical Values	
Vaccination	
*Administration of Influenza Vaccination Documented	Yes ▾
Influenza Vaccination Date	10/2020
Where Influenza Vaccination Received	Documented at Facility ▾
Reason No Administration of Influenza Vaccination Documented <i>(Select one or more reasons)</i>	Medical Reason: Allergic or Adverse Reaction Other Medical Reason Declined Other Reason Outside vaccination reported but no documentation Vaccine data not available

If the patient did not receive the flu vaccine this year; select no and the corresponding reason why the patient did not receive the influenza vaccination.

Clinical Values	
Vaccination	
*Administration of Influenza Vaccination Documented	No ▾
Influenza Vaccination Date	MM/YYYY
Where Influenza Vaccination Received	▾
Reason No Administration of Influenza Vaccination Documented <i>(Select one or more reasons)</i>	Medical Reason: Allergic or Adverse Reaction Other Medical Reason Declined Other Reason Outside vaccination reported but no documentation Vaccine data not available
